

Meeting Notes for November 9

Meeting duration from 1:40 to 3:00 on Friday, November 9

- Talked about Milestone 4
 - Using postgres
 - Created table column for ID
 - Created table column for Username
 - Created table column for Password
 - Created table column for High score
- Created Table
- Populated table with each of our data
- Created relational diagram
- Next Steps:
 - Create NodeJS
 - Connect to heroku
 - Finish!

Meeting Summary: We had a very productive meeting. We went through every point mentioned on Milestone 4 and completed the tasks. We created the database needed for our game and populated the database with the most important entries for now. The data model task was a little unusual for us because it would be difficult to draw a relational diagram but we were able to draw up a visual depiction.
